

Workshop on

Dispersing elements for astronomy: New trends and possibilities

October 9 – 11, 2017

Acquario Civico Milanese, via G.B. Gadio 2, 20121, Milano

Scientific Organizing Committee:

Andrea Bianco	(INAF – Osservatorio Astronomico di Brera)
Francisco Garzón	(Instituto de Astrofísica de Canarias)
Ramon Navarro	(NOVA, Netherlands Research School for Astronomy)
Marco Riva	(INAF – Osservatorio Astronomico di Brera)
Wayne Holland	(STFC – UK Astronomy Technology Centre)
Antonio Manescau	(European Southern Observatory)
Antonio de Ugarte Postigo	(Instituto de Astrofísica de Andalucía)
Rebecca Bernstein	(Carnegie Institution of Science)

Registration Deadline
September 5, 2017

Abstract Submission
July 31, 2017

The aim of the workshop is to bring together researchers and engineers involved in the design and realization of spectroscopic instrumentation for astronomy with companies and research institutes that design and produce dispersing elements for presenting the different technologies, discussing the issues and showing the spectroscopic instrument programs from small telescopes to ELTs.
