

Workshop on

Dispersing elements for astronomy: New trends and possibilities

October 9 – 11, 2017

Acquario Civico Milanese, via G.B. Gadio 2, 20121, Milano

Scientific Organizing Committee:

Registration Deadline

September 20, 2017

Abstract Submission

September 20, 2017

The aim of the workshop is to bring together researchers and engineers involved in the design and realization of spectroscopic instrumentation for astronomy with companies and research institutes that design and produce dispersing elements for presenting the different technologies, discussing the issues and showing the spectroscopic instrument programs from small telescopes to ELTs.
